AstroShield

Get Advanced Antimicrobial Protection with AstroShield®.

All AstroTurf® brand products offer the advanced antimicrobial protection of AstroShield®. Microbial contamination can cause a variety of issues for synthetic turf systems including stains, odors, functionality and health concerns. The round-the-clock antimicrobial protection in AstroShield® is a smart way to protect your turf investment and get the most out of your AstroTurf® field.

Powered by the proven microbe shield technology, AstroShield® provides long-lasting, durable protection for synthetic turf systems 24/7. This microscopic technology is effective against a wide array of bacteria, mold, fungi and algae.

AstroShield® does not interfere with the playability, appearance or performance of AstroTurf® systems. Unlike traditional disinfectants, AstroShield® will not wear or wash off due to exposure and will not leach any chemicals or heavy metals into the environment or onto your players. Because of AstroShield®'s unique physical mode of action, microbes cannot adapt to AstroShield®, so there's virtually no possibility of "super bugs" developing resistance.

AstroShield®. The ultimate protection for AstroTurf® field systems 24 hours a day, 7 days a week for peace of mind that lasts for years.
